## **NOTICE TO THE PUBLIC**

A message from EMO about the impending storm:

Residents should prepare for the storm by having an emergency kit that includes flashlights, a battery-powered radio, a supply of water, ensure backup generators are installed properly outdoors, and charge electronic devices prior to the storm event.

Please encourage your family, friends, and colleagues to be prepared and safe. Everyone needs to limit water consumption during times of power outages.

Stay safe everyone. I will update any information that is forwarded to me from EMO.
